

Can existing learners keep acquiring new dependencies?

6 independent seeds | three physical additions | fixed data and update budgets

Continue Retain weights; reset state
Freeze visual features Fresh weights

Acquisition includes initial competence and adaptation; later episodes also change world complexity.
Paired panels: circles are seeds, diamonds means, lines descriptive 95% intervals. Episodes averaged within seed.
Fresh-model qualification: INCOMPLETE. Forecast improvement need not change the best one-time action. See the report for cue use and final branches.
